

WOODEN LACE

We now also manufacture Family Crest rings in Yellow gold, White gold, Rosegold, silver and also platinum. Ring We can also give an antique effect as seen on these designs. We want to make you part of the design process and a ring like this can be excellent for a wedding ring or just a ring to always have on.

Every ring is different and a quote will be given to you before we start the whole manufacturing.

We are based in George if you want to book a consultation

This is definitely a must have for every man!! Great piece of jewelry to leave behind as a family heirloom.

How does it work?

1. Provide Your Family Crest/Coat of Arms

If your Family Crest or Coat of Arms isn't in our library, you'll need to provide the correct design which can be emailed to ulricke@woodenlace.co.za

We rely on you to supply accurate details since we aren't historians.

2. Decide on Your Design

Choose from traditional oval tops, modern square designs, or something completely unique.

We'll assist in creating a design tailored to your preferences.

3D CAD Rendering Approval

We'll create a detailed 3D CAD rendering of your design.

You'll review and approve it before we proceed to production.

4. Mould and Casting

We create a mould and cast your item in Silver, White Gold, Yellow Gold, Rose Gold, or Platinum. For Titanium: Instead of casting, we 3D print your item.

5. Choose the Finish

Options:

Modern Look: Clean and sleek finish.

Aged Look:

For Silver: Oxidized for a darkened, vintage style.
For Gold: Darkened details using rhodium plating to enhance a 3D appearance.

Every ring is different and a quote will be given to you before we start the whole manufacturing.

WOODEN LACE

Introducing Our New Wood & Titanium Combination Rings

Discover the perfect blend of strength and nature with our custom-made Wood & Titanium rings. Each ring is meticulously crafted, combining the durability of titanium with the timeless beauty of wood. This unique design is one of our specialties and offers a truly personal touch.

We use only the finest wood types for their strength and longevity:

Wild Olive

Rose Wood

African Black Wood

Our wooden rings are untreated, showcasing their natural beauty—just like your personality. To ensure lasting protection, we recommend finishing the design with at least 1mm of titanium on either side of the wood.

🌟 Your input matters—we collaborate with you throughout the design and manufacturing process to create a ring that's uniquely yours.
